IEEE Malaysia Section Newsletter

Message From the Editor

Dear readers,

I am happy to inform everyone that the fourth quarterly edition of 2017 IEEE Malaysia Section Newsletter has finally published. This issue covers the activities that have been conducted by Section, Technical Chapters, Subsections, Affinity Groups and Student Branches between month of October to December, 2017.

This issue highlighted few main events that were organized by the IEEE Malaysia Section namely the 2017 Region 10 Conference (TENCON), Mini POCO, Student Congress and Conference SCOReD2017. In this issue we have received 16 articles from technical chapters, subsection and affinity groups. We also received 2 articles from our student branches. The various activities coming from our technical chapters, subsection, affinity groups and student branches have shown that the IEEE spirit of advancing the technology for humanity has been utilized positively within our Malaysia Section members.

Other new thing that available for your reading in this newsletter is the conference digest. We hope that you can grab important notice on the IEEE conferences that will be held in our country. Finally, thank you to all the submitters for this issue. To the rest, Happy Reading!!!

Rosmiwati Mohd Mokhtar, Editor – IEEE Malaysia Section Newsletter
