IEEE STUDENT BRANCH AWARDS

IEEE Best Student Branch Awards

- Student branches are crucial to the growth and development of IEEE Student members. Student branches create a local network of students and give students the opportunity to meet and learn from fellow students, as well as faculty members and professionals in the field.
- Student branches offer numerous educational, technical, and professional advantages to IEEE Student members through the special projects, activities, meetings, tours, and field trips.
- However, these activities and advantages aren't done without the effort, labor, and diligence of volunteers. IEEE has created several Student Branch Awards to recognize and reward the efforts of these tireless individuals and teams.

Student Enterprise Award

- The IEEE Student Enterprise Award provides financial help to Student members who are looking to implement an idea for a project. It enables IEEE Student members to work with others on an engineering project, while simultaneously strengthening Student Branch programs. Topics may be of a technical or non-technical nature from research on cutting-edge technology, humanitarian, and community-service programs.

Larry K. Wilson Award

Regional Student Activities Award

- The purpose of this award is to recognize annually, in each Region of IEEE, the Student member most responsible for an extraordinary accomplishment associated with Student Activities. The value of a Student member who shows a pattern of dedication and ongoing service to a Student Branch/Student Branch Chapter is certainly recognized. The award is designed to reward a particular event, program, or product of IEEE Student Activities. It is sponsored by the IEEE Member and Geographic Activities (MGA) Board.
 - 2014 Recipient : Esther Ling (IEEE R10)

IEEE Regional Exemplary Student Branch Award

- The purpose of this award is to provide public recognition of exemplary IEEE Student Branch operations.

Darrel Chong Student Activity Award

- The purpose of this recognition system serves to change the mindset of our student groups, from being number-driven, to becoming value-driven and to acknowledge exemplary student activities around the world. The goal is to improve the quality of activities, and to foster knowledge sharing among students. Ultimately, the initiative is targeted at improving student-membership growth. This will encourage and motivate students to continue to innovate and implement meaningful ideas.

MGA Larry K. Wilson Translational Award – deadline 15 Oct

- For exemplary service and significant contributions over many years, particularly developing and maintaining the distinctive Region News, which fosters collaboration and engagement across three continents; works closely with students and the many Section volunteers to report on events and activities across the multi-national and multi-lingual Region.
- For distinguished contributions to IEEE global activities through establishing new technical activities and publications, including an electronic periodical published in Portuguese and Spanish; engaged members from many countries across two IEEE Regions.
- For significant contributions to the IEEE volunteer experience and member engagement throughout the world; supporting transnational student activities both multi-nationally, within the Region, and multi-regionally while serving as a MGA volunteer; supporting cross-Section collaboration; encouraging multi-national cooperation when hosting the Region student congress.
